

CLAIM AMENDMENTS

Please amend the claims as follows:

Claims 1 - 15 (*canceled*)

1 **16. (*presently amended*)** A universal trailer-hitch mirror system comprising:
2 an attachment configuration having a system fastener for fastening the attachment
3 configuration to a support object that is accessible for support of a mirror holder on which
4 a system mirror is positioned for mirror-viewing of tow trailer-hitch components of a tow
5 vehicle and for mirror-viewing of trailerable trailer-hitch components of a trailerable vehicle
6 from a vehicle mirror;
7 the tow vehicle being within hitching-steerable proximity to the trailerable vehicle;
8 the mirror holder being attached orientationally to the attachment configuration with
9 an orientation controller;
10 the system mirror being attached orientationally to the mirror holder selectively with
11 a system-mirror joint;
12 the attachment configuration being articulated to be positioned in desired proximity
13 to rear components of the tow vehicle, to front components of the trailerable vehicle and to
14 objects proximate thereto selectively;
15 the system fastener being articulated predeterminedly to attach the attachment
16 configuration to the support object selectively;
17 the orientation controller being articulated to orient the mirror holder controllably in
18 a desired orientation of attachment to the attachment configuration; and
19 the system-mirror joint being articulated to orient the system mirror in a mirrored line-
20 of-sight from the vehicle mirror to the tow trailer-hitch components and to the trailerable
21 trailer-hitch components selectively,

22 wherein the support object is selected from a group of support objects comprising a
23 back window of the tow vehicle, a pickup-truck tailgate on the tow vehicle and a back of the
24 tow vehicle;

25 the attachment configuration includes a bracket having two bracket attachment rods
26 with controller ends extended in a direction that is outwardly from a rear surface
27 of the tow vehicle;

28 the orientation controller includes two pivot joints with which the mirror holder is
29 attached orientationally and fixedly to the two bracket attachment rods;

30 the system fastener includes a plurality of suction cups on a bracket member
31 intermediate the two bracket attachment rods;

32 the suction cups are articulated and situated to suction-fasten the bracket to the back
33 window of the tow-vehicle;

34 bracket cushioning is situated intermediate the bracket and the rear surface of the tow
35 vehicle;

36 the mirror holder includes a mirror bracket having two mirror attachment rods that are
37 attached to the two bracket attachment rods with the two pivot joints;

38 the system-mirror joint is on a bracket member intermediate the two mirror attachment
39 rods; and

40 the vehicle mirror is a mirror having line-of-sight vision to the system mirror.
